

1.STATE

SHOP-IN-SHOP PROGRAM

TCG teamed up with 1.State to rollout a new Shop-in-Shop Program that would be displayed in various Macy's stores around the U.S. The revolutionary concepts were developed by our Design and Engineering team which created the floor plans to have a unique and elegant appearance.

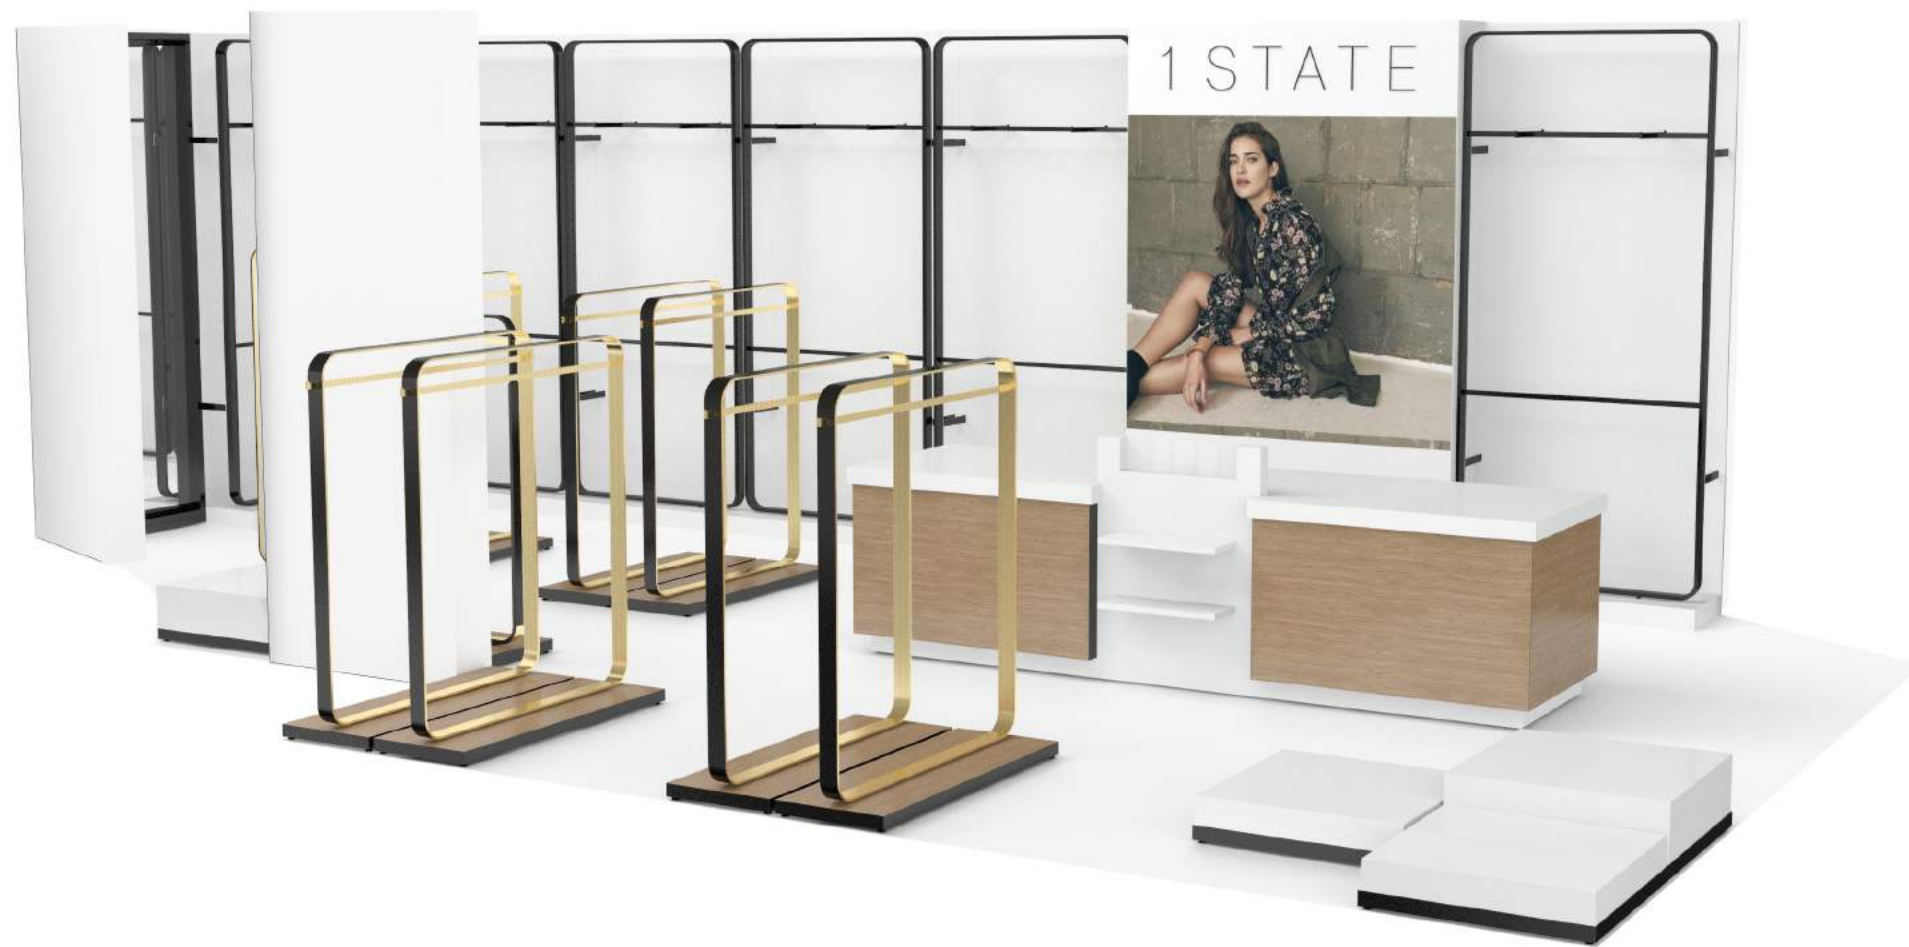

Other key aspects of the rollout included, site surveys, manufacturing, warehousing and shipping services. TCG was able to provide speed to market, lower cost and high quality. These are important components in our business model and allowed us to execute an astonishing program.
